

A range of ultra hygienic cleaning tools for the Healthcare environment

HEALTHCARE

**PROUD TO
BE CANADIAN**

Atlas Graham is a family-owned manufacturer of manual cleaning tools for the professional and retail markets. For over 70 years, our friendly and talented team has responded to the needs of our business partners by providing quality products, exceptional service, and tailored solutions to solve the toughest business challenges. Our commitment to these principles is at the heart of what we do and continues to guide us to this day.

Purasolutions™ is an ultra-hygienic, ergonomic friendly microfibre based system of tools designed to effectively clean environmental surfaces. The Purasolutions™ line of products offers a complete system of lightweight, adjustable tools to ensure you have the right tool for the job at hand.

WHAT FLAT MOPPING SYSTEM IS RIGHT FOR YOU?

AG Microsilver™ is our premium, microfibre flat-mop with enhanced construction and silver self-sanitizing technology. The AG Microfibre is our standard flat-mop.

1. PRE-SOAK

The lightweight, adjustable Kwik™ System allows the user to save time and increase ergonomic comfort by pre-soaking the Z-velcro™-backed microfibre flat-mops in a solution. Buckets come in 20L or 28L versions and are designed to fit the Kwik frame and microfibre flat-mops.

2. ON-BOARD SYSTEM

This self-contained, bucketless, wringer-free tool is ready to go. The Kwikstream can also be deployed with a pre-soak system. The tool is also useful for cleaning stairs and for responding quickly to spills.

The on-board system can provide additional solution to the pre-soaked pad when an area of stubborn dirt buildup is encountered. This method uses damp and wet microfibre flat-mops with a high-quality, Z-velcro™ backing.

3. DIVIDED BUCKET

The collapsible flat-mop frame and handle used with the divided bucket offers a bridge between traditional wet mopping and the improved, ergonomic flat-mopping microfibre system. The bucket is divided to separate dirty water from clean water and features two drains for easy emptying.

Use this non-Velcro method to clean larger areas that are heavily soiled to remove large amounts of dirt.

What makes a quality flat mop?

6 reasons why to choose Microsilver™

AG Microsilver™ microfibre products combine the cleaning power of microfibre with antibacterial technology.

- 1 Millentex® layer Polyester microfibre**
Twisted loops provide increased laundry performance and durability while preventing lint-off. The polyester microfibre blend wears well and can be laundered with bleach at less than 10.7 pH.
- 2 Millentex® layer microfibre cloth**
One of the main benefits of Millentex is that it absorbs large amounts of water and slowly discharges it. This means the user doesn't have to add water frequently to recharge the mop during usage.
- 3 PET layer Polyester non-woven**
The PET non-woven layer acts just like the Millentex cloth. It holds water, acting like a "sub-water tank," releasing solution as required. This layer also acts like a cushion, helping the performance of the mop even when the surface is uneven.
- 4 PP layer Polypropylene non-woven**
This waffle layer adds structural integrity to the mop. It also prevents the rounded corners from curling up when the mop is laundered and subjected to heat.
- 5 Z-velcro™ Polyester backing**
The Z-velcro™ is the backbone of the flat-mop and provides just the right amount of cling to the Kwik™ frame. The Velcro is designed to last the life of the flat-mop and is considered the highest grade on the market.
- 6 Piping, fit & finish Polyester tape**
All the layers are serged together and finishing tape is added to lock all the layers in place.

MICROFIBRE FLAT MOPS & BUCKETS

MICROSILVER™
Dust Mop with Fringe

Features a low-pile microfibre pad with candy-stripe microfibre fringe to trap hairs, dust and light debris.

ITEM#	SIZE	PACK
60330	46cm	6
60331	60cm	6
60333	130cm	6

MICROSILVER™
Damp Mop

Combines the cleaning power of Millentex microfibre with the antibacterial benefit of silver.

ITEM#	SIZE	PACK
60320	Blue (42cm)	6
60321	Green (42cm)	6
60322	Red (42cm)	6
60380	Blue (126cm)	6

MICROSILVER™
Scrub Mop

Stripes of scrubbing fibres loosen dirt from textured surfaces such as tiled flooring or non-slip finishes.

ITEM#	SIZE	PACK
60340	42cm	6

MICROSILVER™
Finish Wax Mop

Designed with excellent release capabilities for streak-free finish application.

ITEM#	SIZE	PACK
60350	42cm	6

MICROBLUE™
Damp Flat Mop

The trapezoidal shape of the pad helps get into corners for thorough cleaning.

2143	40 cm	5
2144	55 cm	5
12145	90 cm	5

One handle can quickly fit to the tool you need, maximizing efficiency and cost

The Kwik System frames are designed for professional use in a commercial environment. They are built with the highest grade extruded channel aluminum and composites available. The low profile frame travels beneath door frames and the quick connector makes changing tools a snap. The vulcanized Velcro® hooks are perfectly matched to the mop's Z-velcro™. Frames are chemical resistant and autoclavable. Velcro® can be removed without tools for cleaning or replacement.

Quick release handle on item #36782

This trigger-release style extension handle with Kwik connector is designed for use with any Kwik system flat frame or the Microblade flexible dust frame. With a squeeze of the trigger, the handle can extend from 42.5" to 69" long, so that it can be adjusted for ergonomic correctness or to reach high areas when dusting with the Microblade dust frame.

BIODEGRADABLE

BIOMOP™ Dusting Sheets

Ideal for healthcare facilities where cross-contamination is a concern. Eliminates costly laundering.

ITEM#	DESCRIPTION	PACK
70143	200/Box	1

DISPOSABLE

DYNAMOP™ Dusting Sheets

Uses an electrostatic charge to attract fine dust and particles. High capacity sheets hold large amounts of dust.

ITEM#	DESCRIPTION	PACK
143	200/Box	1

BIOMOP / DYNAMOP

DUST MOPPING SYSTEM

WHAT IS BIOMOP / DYNAMOP?

The Biomop/Dynamop is an economical, disposable dust mop that uses microscopic fibres to remove dust and dirt from hard surfaces. These fibres create an electrostatic charge to pull the dust and bacteria, as well as larger particles such as hair from the floor.

The Biomop is biodegradable and breaks down into a fraction of its size within 6-8 weeks when disposed of in a landfill or compost.

COST SAVINGS

Unlike traditional dust mops, Biomop & Dynamop do not require costly laundering. When the sheet has been used to clean a defined area, simply dispose of it.

Independent testing shows that the Biomop & Dynamop have twice the pick up as the leading brand sweeper making for a better and more efficient clean.

GREEN CLEANING

The Biomop is also a great addition to any Green Cleaning program as it is biodegradable and can be safely disposed of in a landfill or added to compost. Each sheet breaks down to a tiny fraction of its original size within 6 to 8 weeks. Biomop's biodegradability has been independently tested and proven in accordance with the ASTM D6400-99 standard.

ULTRA HYGIENIC CLEANING

An independent test at the Natec Institute in Germany shows that the Biomop picks up 95 to 98% of bacteria on a polished surface.

This was confirmed by TeknikCentrum, Sweden (report MA-RA41-90.008) using Aspergillus niger fungus as the control.

The frontline staff can now use a one dust mop per room cleaning strategy while still remaining cost effective and reducing the risk of cross contamination.

Simple, versatile hygienic mopping system

Purasolutions™ Breakaway Flat Mop

The collapsible plastic flat mop frame features an innovative design that allows the user to rinse a microfibre flat mop in a roller wringer. The hinged frame easily “collapses” with a simple foot tap so that the mop can be dipped and wrung out in the bucket. The non-Velcro flat mop provides deep-cleaning action on smooth floor surfaces. Use with #61044 extension handle.

ITEM#	DESCRIPTION	PACK
60868	Breakaway Frame - 40cm	5
60695	Blue Microfibre Flat Mop - 45cm	10

Locking drain plugs allow for fast and easy emptying of buckets.

One of the most common problems with traditional buckets is trying to keep your water clean while mopping. The dual action bucket is a simple, hygienic mopping system that utilizes two separate buckets to keep the water cleaner while using less solution.

Emptying the water from the bucket is easy and ergonomic. Simply release the locking plugs to drain the water: there is no need to lift the bucket when it is full. Less frequent trips to change the water mean increased productivity for you and your staff.

Side Press

Roller Wringer

With the Dual Action bucket there are two different styles of wringers: the side press, and the roller wringer. The bucket can also be ordered without the wringer. The side press allows you to use traditional wet mops or microfibre pads with a collapsible frame.

ITEM#	DESCRIPTION	PACK
76451	Bucket with Side Press	1
66451	Bucket with Roller	1
16451	Bucket Only	1

Side / Down Press Bucket

Easy-tip hand grip at the back for easy emptying. Protective bumpers and 3” non-marking, swivel casters.

ITEM#	DESCRIPTION	PACK
86232	35Qt/32L with Side Press Wringer	1
86236	38Qt/36L with Side Press Wringer	1
86332	35Qt/32L with Down Press Wringer	1

Janitorial Cart with Cover

Bottom shelf can easily accommodate a bucket & wringer. Support shelf to help prevent damage to vinyl bags.

ITEM#	DESCRIPTION	PACK
86510	Cart	1

Healthcare Cart

This cart includes: 2 Storage Trays, 2 Handle Clips, 1 Double Hook, Locking cabinet (#70400).

ITEM#	DESCRIPTION	PACK
63450	Cart	1

Extra Locking Cabinet

Large, lightweight box that easily holds a tool caddy, tall spray bottles, chemicals and other supplies.

ITEM#	DESCRIPTION	PACK
70400	Locking Cabinet	1
70410	Key for Locking Cabinet	5

X-Frame Laundry Cart

Lightweight and easy to use. Built tough - won't rust, chip, or crack. Folds for convenient storage.

ITEM#	DESCRIPTION	PACK
86520	Cart	1

WINDOW CLEANING

A quality concept for cleaning windows, doors and even bathroom stalls

Solstice™ Window Cleaning Kit

Made from lightweight yet durable polypropylene and stainless steel
Scrubber is made of dense cut pile microfiber for deep cleaning
High quality rubber blade for a streak free finish

ITEM#	DESCRIPTION	PACK
46001	Starter Kit (contains products below)	1

This kit includes:

- 10' (3m) x 3 section extension pole (46710)
- 10" scrubber refill (46410)
- 14" scrubber refill (46414)
- 10" scrubber t-bar (46310)
- 14" scrubber t-bar (46314)
- 10" stainless steel squeegee channel w/ rubber (46110)
- 14" stainless steel squeegee channel w/ rubber (46114)
- 18" stainless steel squeegee channel w/ rubber (46118)
- stainless steel squeegee handle (46100)

SOLSTICETOOLS

no touch cleaning

If you are using a spray bottle of cleaning solution and paper towels to clean smooth or polished surfaces you are working too hard. A quicker, simpler and safer way to clean surfaces uses a microfibre scrubber, squeegee and plain water.

This method is ergonomically correct and environmentally friendly. A single stroke of the scrubber or squeegee doubles the surface area covered by a hand-held towel, dramatically cutting time spent on the task.

The resulting clean surface is streak-free and can be attained using surprisingly little water. A reduced need for chemicals as well as time saved means this kit pays for itself in about a week or less in most institutions.

NOT ALL MICROFIBRE IS CREATED EQUAL

Our cloths will last up to 500 machine washes

AG ULTRASILVER™

AG Ultrasilver™ microfibre products combine the cleaning power of microfibre with added antibacterial technology. The microfibre picks up dirt and bacteria from environmental surfaces and antibacterial technology in the fibre prevent the growth of micro-organisms within the cloth.

AG ULTRAFIBRE™

Our Ultrafibre™ microfibre is proven to pick up more dirt and bacteria than standard wiping cloths. With Ultrafibre™, you let the microscopic qualities of the textile do most of the work, thereby reducing repetitive strain injuries in the workplace.

Ultrasilver™ Hand Cloth

Antibacterial technology inhibits the growth of micro-organisms within the cloth, preventing foul odours.

ITEM#	DESCRIPTION	PACK
